**Examiner's Comment and Reasons for Allowance**

1. The following is an examiner's comment and statement of reasons for allowance:

Claim 31 was indicated as allowed for the reasons of record, specifically that SEQ ID NO: 13 is novel and unobvious. The current references, and particularly Lizardi, clearly require the use of ligation, as noted by Applicant, to detect the variations. The use of a method without ligation is not taught by Valimaa or Lizardi and these references teach away from such a method by their heavy reliance upon ligation as the detection motif. So the claim as amended clearly distinguishes from the prior art and is novel and unobvious over that prior art.

2. The final comment is the issue of basis of the amendment. Because Applicant has not pointed to basis, the question of whether the limitation is new matter arises. However, a review of the specification, particularly at page 12, line 9, for example, provides express basis for the amendment, since the specification at page 12 states that the method may be performed "without the need for a ligation step" in relation to the method. So the new amendment has express written basis in the specification and is not new matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey Fredman whose telephone number is (571)272-0742. The examiner can normally be reached on 6:30-4:00.
